

Assessment & Evaluation in a Post-AI World: Worksheet

1	<p>What assignment or assessment will you focus on for this exercise? Briefly describe it in its current state. <i>Do not select a “landing the plane” use case.</i></p>		
2	<p>What is/are the learning objective(s) of the assignment?</p>		
3	<p>Is the focus of the assignment on the process, the artifact, or both? If both, note which portions of the assignment are relevant to the process and artifact separately.</p>	<p>Process</p>	<p>Artifact</p>
4	<p>How does this assignment align with activities that graduates do in industry? What role does/will AI play for professionals working with this knowledge/activity?</p>		
5	<p>Try running the current assignment through an LLM now. What does an LLM do well in the assignment, and what does it do poorly? Use your knowledge of prompt generation and multiple prompts to try to get the best possible result out of the AI.</p>	<p><u>Link(s) to AI transcript(s):</u></p>	
		<p>AI did well:</p>	<p>AI did poorly:</p>
		<p>General thoughts:</p>	

For questions 6-10, brainstorm how you could incorporate each of the following AI adjustment strategies – you will select which strategies you will incorporate in question 11.

6	Shift the assignment or elements of it to presentations, debates, live Q&A, etc.		
7	Incorporate intentionally flawed content to have students revise		
8	Require AI use in the assignment to improve the process and/or the artifact.	Process	Artifact
9	What level of AI is appropriate for this assignment? You may find different levels are appropriate for different portions of the assignment and can indicate that here.	<ol style="list-style-type: none"> 1. AI-Assisted Idea Generation & Structuring 2. AI-Assisted Editing 3. AI Task Completion with Human Evaluation 4. Full AI 5. Other 	Notes:
10	How can you <u>demand more</u> of the students, with the use of AI? What are logical next steps you could extend the assignment to? You may consider Bloom’s Taxonomy here.		
11	Which of the strategies you brainstormed above will you/can you incorporate in the assignment? What does the assignment look like after this incorporation? Remember to require transcripts of AI conversations if this makes sense.		
12	How can you incorporate AI in your grading of the new assignment to increase your own efficiency?
