Lenovo

Expanding Access To Funding You Need

GRANTS SUPPORT PROGRAM

OVERVIEW

In collaboration with SIUE, the Lenovo Grants Support Program provides public sector agencies, educational institutions, and hospitals with grants information, customized funder research, and consultation that will help develop project ideas, get technology-rich projects funded, and even expand initiatives that are already in the works.

Through collaboration with SIUE's Office of Research and Projects, Lenovo's Grants Development Consultants will work with you to evaluate your needs and determine the level of support that will maximize the funding you can obtain and optimize the technology you are able to purchase with the grant funds you receive.

FUNDER RESEARCH

More than 5,000 grant programs open annually in the United States, distributing roughly \$500 billion in funding, though many have strict eligibility and use requirements and are not always technology-focused. With details about your concept, Lenovo Grants Support Program consultants create customized reports identifying funding opportunities that align with your project. Projects do not have to include technology to access this **service**.

These reports match potential funders based on project type, organizational structure (including consortium arrangements), and geographic deployment location. Consultants then review the findings with you during a conference call scheduled at your convenience.
