Southern Illinois University Edwardsville Survey of 2009 Baccalaureate Graduates -- Five Year Out

Introduction

This five-year out baccalaureate survey was done to provide data for the University's undergraduate program reviews and other planning uses.

After the first six years, the surveys were reviewed and changed, modifying some questions and value scales, and adding some additional questions.

The current survey was administered during the spring and fall of 2014 to calendar year 2009 baccalaureate graduates of SIUE. The questionnaire includes 20 questions, separated in four themed sections - Employment, Education, Satisfaction Questions, and Educational Effectiveness Questions. The fifth section of the survey includes space for any comment the survey participant wishes to leave. See Appendix 1 for a survey form.

Methodology

The survey questionnaire and a cover letter were adapted from the questionnaire and letter developed for previous surveys. SIUE Alumni Services provided current addresses for calendar year 2009 graduates as determined from institutional records.

The survey was distributed in April 2014. Each envelope included a cover letter, a questionnaire, and a postage-paid, pre-addressed return envelope. Each questionnaire was stamped with a sequential, identifying number which was also stamped on a listing of the graduates (this aided in identifying the surveys when returned).

Surveys were mailed first class to the 1,884 baccalaureate graduates, for whom addresses were available on April 1, 2014. On April 29, a second wave mailing of the surveys was sent to the remaining 1,604 non-respondents.

Returned surveys began arriving as soon as April 8, and continued through the summer and fall, with a few arriving as late as January 2015. As the surveys came in, each was matched with the corresponding stamped listing. The students' names were then checked against the alphabetic list of alumni to verify (or, if the alumnus chose not to provide the identification number, to obtain) the student identification number. The student identification number was the key which allowed merging of survey data with administrative records (e.g., biographic, graduation, matriculation, and enrollment information).
