

HAZING

THE ONLY TRADITION IS HARM

**Hazing doesn't just affect individuals.
The entire organization also suffers.**

Students who experience hazing reported:

DIVISION – hazed members report never feeling equal to their hazers or established members even after the hazing has stopped

DISHONESTY – members of hazing organizations are required to lie about their experiences for the entirety of their membership and beyond

DEGRADATION – hazing tells members that high qualifications and personal attributes alone aren't good enough to be part of this group

LACK OF ACCOUNTABILITY – fear of exposure leads to reluctance to release or take corrective action against problematic members

LACK OF ENGAGEMENT – established members in a hazing organization often disengage once they've "put in their time," believing that newer members should now shoulder the work
